

# SEALED MEMO: Skeptic Agent

Candidate: **ananya\_iyer** | Created: 2026-08-29 11:48:03 UTC

|              |      |
|--------------|------|
| Score (1-10) | 4    |
| Confidence   | HIGH |

## Verdict Summary

The candidate is fundamentally unproven for an 'Agentic Systems' engineering position. She has only shipped single-agent RAG, inflated her resume with an unverified 40% accuracy metric, and has never managed autonomous multi-agent state or tool loops in production.

## Identified Strengths (1)

- **[R-EXP-01]** Maintained reliable Python/FastAPI microservices and OCR pipelines for internal tools

## Identified Gaps / Concerns (3)

- **[T-A3]** Zero production multi-agent orchestration experience; role requires shipping multi-agent workers on day one
- **[T-A2]** 40% accuracy claim on resume was unverified spot-checking without quantitative benchmarks
- **[T-A5]** History of deploying unreviewed prompt changes straight to production resulting in service failures
