Score (1-10)	3
Confidence	HIGH

Verdict Summary

Severe credibility and technical rigor deficit. Resumes claim of 'sole architect' was completely debunked in T-A7 when he admitted teammate Priya built the production implementation. Furthermore, he cannot provide basic metrics on reviewer accuracy and tunes model routing arbitrarily.

Identified Strengths (1)

- [R-EXP-01] Familiarity with LangGraph, CrewAI, and multi-agent concepts in logistics

Identified Gaps / Concerns (4)

- [T-A7] Material resume misrepresentation: claimed 'sole architect' on resume but admitted teammate Priya built most of production code
- [T-A3] Unable to provide data on reviewer agent error catching or override rate
- [T-A4] No formal evaluation or methodology for model routing, relying on ad-hoc tuning as things broke
- [T-A9] No real experience managing high incident volume in production
