|--------------|--------|
| Score (1-10) | 6      |
| Confidence   | MEDIUM |

## Verdict Summary

Strong Python/FastAPI backend foundation and genuine production single-agent RAG experience with Chroma and section-based chunking. However, candidate openly has zero production multi-agent orchestration experience (LangGraph/CrewAI), having only built toy projects.

## Identified Strengths (3)

- **[T-A1]** Demonstrated production RAG pipeline implementation using Chroma and semantic section-based chunking
- **[R-EXP-01]** 4-year track record maintaining Python/FastAPI microservices and OCR ingestion pipelines
- **[R-EXP-02]** Hands-on experience migrating document ingestion to OCR extraction

## Identified Gaps / Concerns (2)

- **[T-A3]** Lacks production multi-agent orchestration framework experience (LangGraph/CrewAI/AutoGen)
- **[T-A2]** 40% accuracy improvement metric was based on informal spot-checks rather than rigorous benchmark
